

ENTREPRENEURSHIP & ELECTRONICS BUSINESS DEVELOPMENT

**A Practical Entrepreneurship Course Paired with the
3-Month Electronic Repairs, Replacement & Maintenance Training Boot
Camp**

TURNING TECHNICAL SKILLS INTO SUSTAINABLE INCOME, PROFESSIONAL PRACTICE & COMMUNITY ENTERPRISE

Trainer Edition • Curriculum & Teaching Manual
Target: Youth 18-35 • Cohort model: 15 trainees • Delivery: 12 weeks
Maxim Nyansa Electronics Ltd – Sierra Leone

Brand & Design Standard

The supplied Maxim Nyansa Electronics logo is used directly as the authoritative brand artwork. The palette below is derived from the supplied image; the original logo preserves its exact typography and proportions.

Brand element	Digital value	Use
Primary green	#88CB01	Headings, bands, emphasis
Black	#000000	Primary text and logo
Neutral gray	#757575	Secondary/supporting text
White	#FFFFFF	Background and contrast

Editable text uses a compatible sans-serif family (DejaVu Sans in the PDF) while the supplied logo image remains unchanged.

- 15. Trainer Resources & Materials
- 16. Business Templates & Worksheets
- 17. Rubrics
- 18. Glossary
- 19. Implementation Checklist

1. Programme Overview

The Entrepreneurship & Electronics Business Development Course is the enterprise track attached to the Maxim Nyansa Electronics three-month Electronic Repairs, Replacement & Maintenance Boot Camp. It ensures that technical competence is translated into employability, self-employment, responsible business practice and sustainable income generation.

Core pathway: Technical Skill → Business Skill → First Customer → First Income → Reinvestment → Enterprise Growth.

- Technical track: electronics repair, replacement, maintenance and troubleshooting.
- Entrepreneurship track: opportunity identification, business models, costing, pricing, finance, customers, marketing, procurement and enterprise launch.
- Professional-development track: communication, teamwork, discipline, time management and ethics.
- Practical track: real-life repair projects and refurbishment exercises.
- Launch track: business plan, enterprise pitch, first-customer plan and starter-kit orientation.
- Follow-up track: six-month graduate enterprise and employment follow-up.

2. Course Purpose & Philosophy

The course treats entrepreneurship as applied problem-solving. Trainees identify a customer problem, deliver a technically sound solution, price the service, document the transaction, protect customer property, manage cash and use income to strengthen the business.

- A trainee can explain what they can repair and who needs it.
- Prepare a realistic quotation.
- Calculate direct cost and expected profit.
- Keep a basic cashbook and inventory record.
- Communicate professionally with customers.
- Market a service using low-cost channels.
- Evaluate a used device for refurbishment.
- Produce and present a practical business plan.

3. Programme Architecture

Stage	Expected activity
TRAIN	Technical and entrepreneurship instruction
PRACTICE	Workshop repair + business exercises
BUILD	Business plan, tools, systems and customer processes
LAUNCH	Starter kit + first-customer plan + enterprise pitch
FOLLOW UP	Graduate mentoring and outcome tracking
GROW	Reinvestment, partnerships, employment and enterprise development

4. Learning Outcomes

Knowledge

- Explain entrepreneurship, business models, revenue, cost, profit and cash flow.
- Describe local electronics-market opportunities and customer groups.

- Understand procurement, inventory, customer service, risk and ethics.

Practical skills

- Prepare quotations and cost sheets.
- Maintain a cashbook and stock record.
- Conduct customer interviews.
- Create a low-cost marketing plan.
- Assess a device for refurbishment economics.
- Develop a business plan and pitch.

Professional behaviours

- Reliability
- Integrity
- Customer respect
- Confidentiality
- Safety
- Time discipline
- Continuous learning

Enterprise readiness

- Define a target market.
- Select a feasible starting service.
- Plan startup resources.
- Set prices with cost awareness.
- Plan first-customer acquisition.
- Set a 90-day launch plan.

5. Target Group & Entry Expectations

- Primary participants: underprivileged young people, generally 18–35 years, interested in electronics, entrepreneurship and community service.
- Basic literacy and numeracy sufficient for simple records and calculations.
- Willingness to participate in practical work and field research.
- Respect for workshop safety and customer property.
- Commitment to attendance, teamwork and assignments.

6. Delivery Method & Trainer Guidance

Recommended weekly format

- 3-hour entrepreneurship session each week.
- Short theory input.
- Demonstration/case study.
- Individual or group practical.
- Reflection and assignment.

Teaching principles

- Use Sierra Leone-relevant examples and SLE figures.
- Connect every business lesson to an actual repair scenario.
- Avoid unnecessary theory without a practical output.
- Require trainees to document decisions.
- Use peer feedback before trainer feedback.
- Treat simulation failure as a learning opportunity.

Trainer preparation

- Prepare realistic repair/service cases.
- Bring sample quotations, job cards, receipts and stock cards.
- Prepare current-looking but clearly instructional supplier/customer examples.
- Maintain confidentiality when discussing real customer cases.

7. 12-Week Integration Plan

Week	Technical track	Enterprise track	Main output
1	Electronics fundamentals & safety	Entrepreneurial mindset	Personal enterprise profile
2	Components & testing	Market research	10-customer survey
3	Soldering/desoldering	Finding opportunities	Opportunity canvas
4	Laptop/Desktop repair	Business models	Business Model Canvas
5	Laptop/Desktop practicals	Starting a small business	Startup checklist
6	Mobile repair	Costing, pricing & profit	Three quotations
7	Mobile practicals	Bookkeeping	Cashbook
8	TV repair	Customer service	Role-play + intake form
9	Advanced troubleshooting	Marketing	30-day marketing plan
10	Board-level repair	Procurement/inventory + digital entrepreneurship	Stock system + digital profile
11	Real-life repair projects	Refurbishment + risk/ethics	Business simulation
12	Final technical assessment	Business plan + enterprise pitch	Enterprise launch portfolio

Module 01: Entrepreneurial Mindset & Self-Reliance

CONTACT TIME: 3 HOURS | DELIVERY: PRACTICAL + PROJECT-BASED

Learning objectives

- Define entrepreneurship and distinguish it from employment and self-employment.
- Identify personal technical strengths, gaps and resources.
- Develop discipline, resilience, professionalism and goal-setting habits.
- Connect technical competence with value creation and income generation.

Core content

- Entrepreneurship as problem-solving
- Technician versus entrepreneur
- Self-reliance and initiative
- Growth mindset and learning from failure
- Professional discipline
- Goal setting and personal action plans
- Integrity, reliability and reputation
- Time management and work ethic

Classroom / workshop activities

- My Technician-to-Entrepreneur Profile
- Personal skills audit
- 90-day personal enterprise goal
- Problem-to-value mapping
- Peer feedback circle

Required outputs

- Personal enterprise profile completed
- One realistic income goal
- Personal skills-development action plan

Trainer emphasis

Do not present entrepreneurship as motivational speaking alone. Make trainees connect mindset to observable behaviours: punctuality, documentation, follow-through and customer responsibility.

Module 02: Understanding the Electronics Repair Market

CONTACT TIME: 3 HOURS | DELIVERY: PRACTICAL + PROJECT-BASED

Learning objectives

- Identify potential customer groups and common electronics problems.
- Use basic market research to validate a service idea.
- Distinguish a market need from an assumption.
- Document local competitors, pricing signals and customer expectations.

Core content

- Households, students, offices, schools, NGOs and small businesses
- Common repair demand
- Customer pain points
- Competitor observation
- Price discovery
- Service gaps
- Trust and reputation factors

Classroom / workshop activities

- 10-customer market survey
- Competitor observation sheet
- Customer interview role-play
- Market-gap wall

Required outputs

- Local market survey
- Customer profile
- Three validated service opportunities

Trainer emphasis

Teach trainees to validate assumptions through conversations and observation. A market survey is useful only when it changes or confirms a business decision.

Module 03: Finding Business Opportunities

CONTACT TIME: 3 HOURS | DELIVERY: PRACTICAL + PROJECT-BASED

Learning objectives

- Generate viable business ideas from technical problems.
- Evaluate opportunities using demand, skill, capital, risk and profitability.
- Select a focused starting service rather than trying to do everything.

Core content

- Repair opportunities
- Maintenance contracts
- Mobile/on-site service
- Refurbishment
- Parts and accessories
- Institutional support
- Training/mentoring as future expansion
- Opportunity screening: demand, capability, startup cost, margin, risk

Classroom / workshop activities

- Opportunity canvas
- Problem-solution mapping
- Opportunity scoring matrix (without ranking political content; ordinary business ranking is fine)
- Community opportunity walk

Required outputs

- Three opportunity concepts
- One selected launch concept
- Opportunity validation notes

Trainer emphasis

Keep opportunity generation grounded in problems trainees can realistically solve with current or near-term technical skills.

Module 04: Electronics Business Models

CONTACT TIME: 3 HOURS | DELIVERY: PRACTICAL + PROJECT-BASED

Learning objectives

- Explain multiple ways an electronics technician can earn income.
- Choose a business model appropriate to available resources.
- Understand blended models such as repair + parts + refurbishment.

Core content

- Repair shop
- Mobile technician
- Home-based workshop
- Refurbishment and resale
- Parts/accessories
- Institutional maintenance
- Repair + sales
- Partnership/cooperative model
- Revenue streams and recurring income

Classroom / workshop activities

- Business-model canvas
- Compare two operating models
- Revenue-stream mapping
- Service-package design

Required outputs

- Business Model Canvas
- Primary revenue stream
- Secondary/expansion revenue stream

Trainer emphasis

Show that a business can begin narrowly and add revenue streams after operational stability improves.

Module 05: Starting a Small Electronics Repair Business

CONTACT TIME: 3 HOURS | DELIVERY: PRACTICAL + PROJECT-BASED

Learning objectives

- Plan a safe and practical startup.
- Differentiate essential startup requirements from later expansion.
- Design a basic workflow from customer intake to delivery.

Core content

- Business location
- Home/shared/mobile models
- Workbench and safety
- Customer reception
- Job identification
- Device intake and tagging
- Repair workflow
- Storage and security
- Basic branding
- Opening-day checklist

Classroom / workshop activities

- Design a small workshop layout
- Create a startup checklist
- Build a job-card workflow
- Startup resource plan

Required outputs

- Startup checklist
- Workspace plan
- Customer-to-delivery workflow

Trainer emphasis

Stress safe operations, device tracking and customer-property controls from the first day.

Module 06: Costing, Pricing & Profit

CONTACT TIME: 3 HOURS | DELIVERY: PRACTICAL + PROJECT-BASED

Learning objectives

- Calculate direct and indirect business costs.
- Set service prices using a defensible cost-plus approach.
- Distinguish revenue, cost, gross profit and net profit.
- Recognize the financial impact of rework, warranties and discounts.

Core content

- Parts cost
- Labour cost
- Transport
- Utilities and overhead
- Tool depreciation concept
- Risk allowance
- Markup versus margin
- Break-even concept
- Quotations
- Discounting
- Warranty/rework provision

Classroom / workshop activities

- Repair costing cases
- Pricing worksheet
- Break-even mini-case
- Quotation practice
- Price-defense role-play

Required outputs

- At least three completed cost sheets
- Three customer quotations
- Profit calculation exercise

Trainer emphasis

Make every trainee calculate at least three realistic repair jobs. Explain that underpricing can be as damaging as overpricing.

Module 07: Money Management & Basic Bookkeeping

CONTACT TIME: 3 HOURS | DELIVERY: PRACTICAL + PROJECT-BASED

Learning objectives

- Keep simple daily financial records.
- Separate business money from personal money.
- Track sales, expenses, stock purchases and cash balance.
- Use records to make reinvestment decisions.

Core content

- Capital
- Revenue
- Expenses
- Cash flow
- Profit
- Owner drawings
- Reinvestment
- Daily cashbook
- Expense register
- Inventory value
- Weekly business review

Classroom / workshop activities

- Daily cashbook simulation
- Cash reconciliation
- Profit-and-reinvestment exercise
- Identify leakage/errors

Required outputs

- Completed cashbook
- Weekly business summary
- Reinvestment decision

Trainer emphasis

Use a physical cashbook and simulated cash. Require reconciliation; records must match cash and documented transactions.

Module 08: Customer Service & Professional Conduct

CONTACT TIME: 3 HOURS | DELIVERY: PRACTICAL + PROJECT-BASED

Learning objectives

- Provide professional customer intake and communication.
- Protect customer property and information.
- Manage quotations, delays, complaints and warranty expectations.

Core content

- Customer greeting
- Diagnostic questions
- Device condition record
- Customer consent
- Quotation and approval
- Repair timelines
- Data confidentiality
- Complaint handling
- Warranty communication
- Professional language and appearance
- Trust and referrals

Classroom / workshop activities

- Customer/technician role-play
- Difficult-customer scenarios
- Device intake drill
- Complaint resolution exercise

Required outputs

- Customer intake form
- Quotation
- Complaint-response demonstration

Trainer emphasis

Trust is an asset. Customer service includes honesty about uncertainty, repair timelines and device condition.

Module 09: Marketing & Customer Acquisition

CONTACT TIME: 3 HOURS | DELIVERY: PRACTICAL + PROJECT-BASED

Learning objectives

- Explain the difference between marketing, promotion and selling.
- Create a low-cost local marketing plan.
- Use WhatsApp and social channels professionally.
- Build referrals through quality service.

Core content

- Value proposition
- Brand identity
- Word of mouth
- Community marketing
- Signage and flyers
- WhatsApp Business
- Social media content
- Before/after content
- Testimonials
- Referral systems
- Partnership marketing

Classroom / workshop activities

- Create a service flyer
- WhatsApp Business profile exercise
- 30-day marketing calendar
- Customer referral script

Required outputs

- Marketing plan
- Sample promotional content
- 30-day customer-acquisition plan

Trainer emphasis

Teach consistent, useful communication rather than spam. Demonstrate before/after documentation and referral systems.

Module 10: Procurement, Inventory & Spare Parts

CONTACT TIME: 3 HOURS | DELIVERY: PRACTICAL + PROJECT-BASED

Learning objectives

- Source parts responsibly and economically.
- Maintain basic inventory records.
- Identify fast-moving, slow-moving and risky stock.
- Reduce losses from poor storage, counterfeit items and overstocking.

Core content

- Supplier selection
- Price comparison
- Part authenticity
- Stock cards
- Reorder points
- Fast/slow-moving stock
- Component storage
- Damaged stock
- Purchasing controls
- Supplier relationships

Classroom / workshop activities

- Supplier comparison
- Inventory card
- Reorder calculation
- Counterfeit-risk scenario

Required outputs

- Supplier list
- Inventory sheet
- Simple reorder system

Trainer emphasis

Poor purchasing decisions can lock up scarce capital. Teach small-batch purchasing and reorder discipline.

Module 11: Refurbishment & Circular Electronics

CONTACT TIME: 3 HOURS | DELIVERY: PRACTICAL + PROJECT-BASED

Learning objectives

- Assess whether used equipment is worth repairing.
- Calculate refurbishment cost and potential resale economics.
- Apply testing, quality control and responsible data handling.
- Understand electronic waste and responsible disposal.

Core content

- Repair versus refurbishment
- Acquisition assessment
- Diagnostic cost
- Cleaning and testing
- Data protection
- Grading
- Resale documentation
- Warranty considerations
- E-waste

Classroom / workshop activities

- Refurbishment case
- Used-device assessment
- Repair-or-reject decision
- Resale pricing exercise

Required outputs

- Refurbishment worksheet
- QC checklist
- Refurbished asset record

Trainer emphasis

A used device is not automatically an opportunity. Repair economics, testing, data protection and resale risk must be assessed.

Module 12: Digital Entrepreneurship & WhatsApp Business

CONTACT TIME: 3 HOURS | DELIVERY: PRACTICAL + PROJECT-BASED

Learning objectives

- Use digital tools to attract and serve customers.
- Build a professional digital presence.
- Maintain basic digital customer and job records.

Core content

- WhatsApp Business profile
- Catalogue
- Quick replies
- Status marketing
- Customer labels
- Digital photos
- Digital quotations
- Online reputation
- Basic spreadsheets/forms
- Cyber hygiene and account security

Classroom / workshop activities

- Create a digital business profile
- Service catalogue
- Customer message templates
- Before/after content exercise

Required outputs

- Digital business profile
- Service catalogue
- Digital communication plan

Trainer emphasis

Digital tools should simplify customer acquisition and communication, not create an unrealistic technology burden.

Module 13: Business Risk, Ethics & Legal Awareness

CONTACT TIME: 3 HOURS | DELIVERY: PRACTICAL + PROJECT-BASED

Learning objectives

- Identify operational, financial, safety and reputational risks.
- Apply ethical principles in repair and sales.
- Understand the importance of business registration, tax and local compliance without treating this course as legal advice.

Core content

- Customer property
- Data/privacy
- Electrical safety
- Fire risk
- Fraud and misrepresentation
- Counterfeit parts
- Unauthorised work
- Warranty disputes
- Record keeping
- Registration awareness
- Tax awareness
- Insurance concept
- Business continuity

Classroom / workshop activities

- Risk register
- Ethics scenarios
- Safety audit
- Business-continuity mini-plan

Required outputs

- Risk register
- Ethical decision log
- Safety checklist

Trainer emphasis

Use concrete scenarios: lost customer data, counterfeit components, unsafe work, disputed repairs and cash leakage.

Module 14: Business Planning & Enterprise Launch

CONTACT TIME: 3 HOURS | DELIVERY: PRACTICAL + PROJECT-BASED

Learning objectives

- Integrate technical capability, market knowledge and finance into a viable business plan.
- Present a concise enterprise pitch.
- Prepare for first customer and post-graduation follow-up.

Core content

- Business identity
- Problem
- Target customer
- Services
- Business model
- Startup budget
- Pricing
- Marketing
- Operations
- Risk
- Financial projection
- Growth plan
- First-customer strategy
- 90-day launch plan

Classroom / workshop activities

- Full business-plan workshop
- Peer review
- Enterprise pitch rehearsal
- Final pitch

Required outputs

- Completed business plan
- Enterprise pitch
- 90-day launch plan
- First-customer plan

Trainer emphasis

The business plan must describe what the trainee will actually do in the first 90 days, not an unrealistic long-term company.

9. Practical Enterprise Project: Build Your Electronics Business

Week 1: Business idea + personal capability audit

Week 2: Customer and market research

Week 3: Opportunity validation

Week 4: Business model

Week 5: Startup requirements and operating workflow

Week 6: Costing and pricing

Week 7: Cashbook and financial controls

Week 8: Customer-service system

Week 9: Marketing plan

Week 10: Procurement, inventory and digital profile

Week 11: Refurbishment/business simulation

Week 12: Final business plan, 90-day launch plan and pitch

10. Assessment Framework

Assessment	Weight	Evidence
Market research	10%	Survey + customer profile + opportunity notes
Opportunity development	10%	Opportunity canvas and validation
Costing & pricing	10%	Three repair/service cost sheets and quotations
Bookkeeping	10%	Cashbook + reconciliation + weekly summary
Customer service	10%	Role-play + completed intake/quotation
Marketing	10%	30-day plan + sample promotional content
Procurement/inventory	10%	Supplier comparison + stock system
Business simulation	10%	End-to-end simulated enterprise
Final business plan	15%	Complete written business plan
Enterprise pitch	5%	5-7 minute presentation

Passing standard: trainees should demonstrate both understanding and application. A trainee who can define profit but cannot price a real repair or keep a cashbook has not yet demonstrated enterprise readiness.

11. Final Business Plan Requirements

1. Business name and owner profile
2. Executive summary
3. Problem and customer need
4. Target customers
5. Services and value proposition
6. Business model and revenue streams
7. Competitor/context analysis
8. Startup requirements and asset plan

9. Costing and pricing
10. Marketing and customer acquisition
11. Operations and workflow
12. Procurement and inventory
13. Risk and ethics
14. Basic 90-day financial projection
15. First-customer strategy
16. 90-day launch plan
17. Growth and reinvestment plan
18. Support/mentorship needs

Minimum financial tables

- Startup budget
- Service costing sheet
- Monthly sales assumption
- Monthly operating expense estimate
- Expected gross profit
- Cash reserve/reinvestment plan

12. Enterprise Pitch

- Business identity
- Problem
- Solution
- Target customer
- Services
- Why customers will trust the service
- Startup requirements
- Pricing logic
- Marketing
- Expected first 90 days
- Risks
- Support required

Pitch assessment rubric

Criterion	Evidence	Weight
Clarity	Clear problem, customer and service	20
Market evidence	Uses actual research/observations	20
Business logic	Coherent model and operations	20
Financial logic	Costs, price and cash awareness	20
Launch readiness	Concrete first-customer and 90-day actions	20

13. Starter Kit & Graduate Launch

The starter kit should be treated as an enterprise asset and accompanied by orientation on asset responsibility, safe use, maintenance, storage, inventory and income generation.

- Tool inventory and handover record
- Tool maintenance plan
- Safe storage plan
- Replacement/reinvestment plan
- First-customer target
- 30-day service target
- Monthly recordkeeping expectation

14. Six-Month Graduate Follow-Up

Follow-up point	Information to capture
Month 1	Location/status; first customer; tool use; immediate barriers
Month 2	Customers served; services delivered; income activity; mentorship
Month 3	Operating status; recurring customers; stock/tool needs
Month 4	Business/employment progress; challenges; additional training
Month 5	Revenue activity; reinvestment; partnerships
Month 6	Enterprise/employment status; lessons learned; next-stage plan

15. Trainer Resources & Materials

Room/workshop resources

- Whiteboard/flipchart
- Projector where available
- Sample job cards
- Sample receipts/quotations
- Cashbook sheets
- Inventory cards
- Calculator
- Sample components and packaging
- Faulty/used devices for case exercises

Digital resources

- Spreadsheet template
- WhatsApp Business demonstration device
- Digital photo/documentation workflow
- Offline copies of forms for low-connectivity conditions

Human resources

- Lead technical trainer
- Entrepreneurship facilitator

- Guest business practitioner where available
- Mentor/alumni speakers
- Assessment panel

16. Business Templates & Worksheets

Form	Template	Main fields
A	Trainee Enterprise Profile	Name, skills, target customer, service idea, location, 90-day goal
B	Customer Market Survey	Customer type, device, problem, current solution, price signal, unmet need
C	Opportunity Canvas	Problem, customer, solution, resources, risk, validation evidence
D	Business Model Canvas	Customer segments, value proposition, channels, relationships, activities, resources, partners, costs, revenue
E	Startup Budget	Tools, parts, transport, workspace, marketing, reserve
F	Repair Costing Sheet	Parts, labour, transport, overhead/risk, total cost, price, expected profit
G	Quotation	Customer, device, diagnosis, work, parts, labour, total, approval
H	Job Card	Intake condition, accessories, fault, work, technician, status, delivery
I	Daily Cashbook	Opening cash, income, expenses, closing cash, reconciliation
J	Expense Register	Date, item, reason, amount, proof/reference
K	Inventory Card	Item, opening, purchases, usage/sales, balance, reorder point
L	Supplier Comparison	Supplier, item, unit price, quality notes, lead time, payment terms
M	Marketing Plan	Audience, message, channel, frequency, budget, expected response
N	Customer Feedback	Service, communication, turnaround, satisfaction, referral permission
O	Risk Register	Risk, likelihood, impact, control, owner
P	Refurbishment Assessment	Purchase cost, repair cost, test result, total investment, resale estimate
Q	90-Day Launch Plan	Week, action, target, resource, evidence
R	Graduate Follow-Up	Status, customers, income activity, support needed, next action

17. Reproducible Blank Forms

A. Trainee Enterprise Profile

Field	Trainee response

B. Customer Market Survey

Customer	Device/problem	Current solution	Price signal	Opportunity

C. Repair Costing Sheet

Item	Parts	Labour	Transport/other	Total cost	Price	Profit

D. Daily Cashbook

Date	Description	Income	Expense	Balance	Reference

E. Inventory Record

Item	Opening	In	Out	Balance	Reorder point

F. Risk Register

Risk	Likelihood	Impact	Control	Responsible person

18. Rubrics

Business Plan Rubric

- Problem/customer need is clearly defined.
- Services match trainee capability and market evidence.
- Startup resources are realistic.
- Costing/pricing is internally consistent.
- Marketing actions are practical.
- Operations include customer intake and records.
- Risks and controls are identified.
- 90-day launch plan is specific and measurable.

Customer Service Rubric

- Professional greeting and listening
- Accurate device intake
- Clear diagnosis explanation
- Quotation before unauthorised work
- Respect for customer property
- Clear timeline
- Professional complaint handling
- Confidentiality/data protection

Business Simulation Rubric

- Correct customer intake
- Technically appropriate job routing
- Cost calculation
- Quotation
- Parts/procurement decision
- Cash recording
- Inventory update
- Customer communication
- Profit calculation
- Reflection on errors

19. Glossary

Term	Working definition
Entrepreneur	A person who organizes resources to create and deliver value while accepting business responsibility and risk.
Revenue	Money earned from sales or services before expenses are deducted.
Cost	Resources consumed to deliver a product or service.
Profit	Revenue remaining after relevant costs and expenses are deducted.
Cash flow	Movement of money into and out of a business.

Term	Working definition
Capital	Money or assets committed to starting or operating a business.
Markup	Amount added to cost to determine a selling price.
Margin	Profit expressed relative to selling price.
Refurbishment	Restoring a used or faulty device to a functional, presentable condition for continued use or resale.
Value proposition	The practical reason a customer should choose a particular service.
Inventory	Goods, components, parts and accessories held for use or sale.
Break-even	The point where total revenue equals total costs.
Customer acquisition	Activities used to obtain new customers.
Reinvestment	Putting part of business earnings back into the business.
Job card	A record that tracks a customer's repair from intake through completion.
Quotation	A stated price and scope of work provided before authorized service.
Warranty	A stated commitment regarding specified defects or service conditions, subject to its terms.

20. Implementation Checklist

- Confirm entrepreneurship facilitator and technical trainer coordination.
- Schedule one dedicated entrepreneurship session per week.
- Prepare printed forms and case studies.
- Collect market-survey evidence during the programme.
- Ensure trainees complete costing, cashbook and inventory exercises.
- Integrate enterprise questions into technical practicals.
- Complete business plans before graduation.
- Conduct enterprise pitches.
- Orient starter-kit recipients on asset responsibility.
- Create graduate follow-up register.
- Schedule 1-, 2-, 3- and 6-month follow-up points.
- Use graduate evidence to improve subsequent cohorts.

MAXIM NYANSA ELECTRONICS: TRAINING YOUNG PEOPLE NOT ONLY TO REPAIR ELECTRONICS, BUT TO CREATE VALUE, BUILD TRUST, GENERATE INCOME AND SERVE THEIR COMMUNITIES.

This curriculum is designed as a reusable enterprise component of the Maxim Nyansa Electronics three-month technical boot camp and can be delivered with future cohorts and expanded as the Learning Company develops its repair, refurbishment, sales, mentorship and enterprise ecosystem.
